

Wellness laboratory testing helps you manage your health.

A physician's order is not required but if you are interested in wellness testing as part of your provider visit, let your provider know at your appointment.

Tests are offered during business hours Monday-Friday at all MCRHC clinic locations. The MCRHC lab in Osage is open Monday-Friday from 7 a.m. to 5 p.m. and on Saturdays until noon. Call first for an appointment.

Anyone under 18 years of age must be accompanied by a parent or legal guardian. The customer or legal guardian must take responsibility for the follow up of abnormal results.

Payment in cash or check must be received at the time of service; insurance will not be billed.

The results will be sent directly to you within one week of collecting the specimen.

You are encouraged to share these results with your health care provider. Contact Mitchell County Regional Health Center's Laboratory if you have any questions at 641-732-6051.

Wellness Laboratory Testing is not a substitute for regular medical care.

NEW!

COVID-19 IgG Anitbody \$30

Detects the antibody (IgG) of SARS-CoV-2, the virus that causes COVID-19. This test is NOT intended to detect an active infection.

Wait to be tested until 14 days after symptoms start. The time the antibody is detected varies from person to person.

The test does not distinguish between being infected with COVID and the antibodies developed from the vaccine.

Do not be tested:

- If you are feeling sick or have a fever in the last three days.
- If you think you are currently infected.
- You have a lab confirmed positive COVID-19 test in the last 14 days.
- If you have a condition that makes it difficult to fight infections.
